# TEEN CEO DAY

## CAREER EXPLORATION OPPORTUNITY

November 13-14, 2018 • Gateway Conference Center

The STEM Development Foundation along with Chester County and the Chester, Lancaster and York School Districts will host the fourth Teen CEO Day at the Gateway Conference Center in Chester on November 13 and 14. There will be approximately 2,400 8th grade students from the Chester, Lancaster and York School Districts each day. Students will have an opportunity to meet with representatives from more than 40 area companies and learn about career skills necessary to compete in the 21st Century.

Students will also hear from Brooks Harper, a nationally recognized speaker, who advises students on steps they can take now to ensure they will be able to prepare for a successful career, while meeting the workforce demands of our local companies.

The mission of the STEM Development Foundation is to bring together community leaders to foster Science, Technology, Engineering and Math (STEM) education, work to increase the number of participants in STEM programs in K-12, Technical Colleges and Universities, and to be a hub for STEM activities
